Interdisziplinäres Forum zur Nacht.

Interdisciplinary discussions on night.

Berlin's simulated cosmos: how planetaria help preserve the sky

Anna Green Leitung | INTENSE & Ausstellungen Stiftung Planetarium Berlin

Walking through the streets of Berlin at night, we often think nothing of the lamps that light our way. We indulge in the showmanship and convenience of illumination throughout the year. Unfortunately, the more we enjoy our artificial lights, the more we lose the beauty of our natural sky. How do we ensure that future generations have the opportunity to know the night sky? In my talk, I will briefly discuss the history of light in Berlin: both its extremely enjoyable side, as well as the disappointment such illumination can bring. I will then discuss how the Stiftung Planetarium Berlin uses technology to educate our visitors about astronomy, and foster a passion to protect our dark skies.

15.09.2021 // 20.00 Uhr // 8 p.m. CEST

Archenhold Sternwarte, Alt-Treptow 1, 12435 Berlin
